## Profile

Creative Computing graduate from Goldsmiths, University of London (2025), blending front-end development, artificial intelligence, and physical computing. Experienced in building user-friendly websites and interactive tools with JavaScript, HTML/CSS, and creative libraries like p5.js. Delivered hands-on workshops in physical computing to children, empowering them to explore tech through Arduino and coding. Passionate about developing digital experiences that are both innovative and impactful – especially in education, creative tech, and data-driven design.
